Fig. 7.

Fig. 8.

Fig. 9.

FIG. 10 is a perspective view of a cross-section of a first embodiment of a shoe sole assembly. The sole assembly includes a base layer 142 and a top layer 148. The top layer 148 is formed of a material having a wavy, undulating surface. The base layer 142 is formed of a material having a smooth, flat surface. The top layer 148 is disposed on top of the base layer 142. The sole assembly is shown in a perspective view, with the top layer 148 and base layer 142 being the main components. The top layer 148 is shown with a wavy, undulating surface, and the base layer 142 is shown with a smooth, flat surface. The sole assembly is shown in a perspective view, with the top layer 148 and base layer 142 being the main components.
